Joshua Lederberg  
Professor of Genetics  
Stanford University Medical Center  
Stanford, California 94305

Dear Dr. Lederberg:

I very much appreciate your thoughtful comments on the report of AHI's Toxicology Task Force entitled "Scientific Application of the Delaney Clause." I certainly will take the opportunity to make your comments available to the Task Force members, and you may be assured that we will continue to keep you informed as we become more involved in very complex regulatory-scientific issues associated with carcinogenicity in general, and the Delaney Clause in particular.

As you requested I have enclosed the Food and Drug Administration's policy proposal of July 19, and I will make available our detailed analysis and commentary on this proposal when it is completed. I am also enclosing the Roster and By-Laws of the AHI together with our most recent Annual Report.

Thank you again for your interest.

Sincerely,

Fred H. Holt  
Executive Vice President
